NOTICE OF STREET WORK

Starting approximately September, 2009, the City of Los Angeles, Department of Public Works, Bureau of Street Services will begin roadway improvements in Council District 12 on Reseda Boulevard, from San Fernando Mission Road to Devonshire Street, which is represented by your Councilmember Greig Smith.

The project will require the preparation of the existing roadway by one of the following initial phases: cold milling the street at the gutter area, or cold milling the street at the gutter area and full depth removals and repairing of failed areas of the street, or reconstruction of the existing roadway. The final phase is the resurfacing the street. The work will be scheduled so that the project will be completed within two to four weeks, provided no extenuating circumstances arise. If the project length exceeds four weeks, you will be notified of the reason for the delay and the revised completion date.

While the project is in progress, "Temporary No Parking Signs" will be posted on the street. The signs will be posted at least 24 hours before the actual work begins to provide notice to residents and business owners. Please have all vehicles removed from the street to protect them from damage by construction debris and to prevent interference with the planned work. When work is not in progress between the preparations and resurfacing phases the signs will be reversed to provide vehicular parking.

Vehicles will have access during the resurfacing project. However, it is requested that driving be limited within the project area to avoid possible damage to your vehicle. The only time that access will be restricted within project area is when the street is coated with liquid asphalt, prior to the resurfacing of the street.

When the crews are working, there will be construction equipment and trucks in the area. Since this equipment is of interest to children, for their safety, remind them to be careful and avoid the equipment and work-site area. Thank you for your understanding and patience during this project. If you have any questions, please try and contact the supervisor on the project site or call (818) 756-8651.

Please note: If you plan any improvements to your business or residence that requires an excavation in the street, please call the above number immediately. Once the street is resurfaced, any excavations in a newly paved street within one year after the date of the paving will require the resurfacing of the entire block, or intersection, depending on the location of the excavation. If the street excavation is performed beyond the one-year period, a graduated fee will apply. (Street Damage Restoration Fee per City Resolution No. 96-0726).
